

Tie down

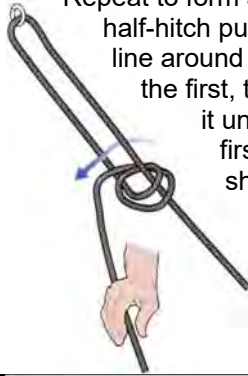

Run rope through tiedown eyelet from back of the plane to the front

Circle the line around and through to form first half-hitch (6-12" from tiedown eyelet)

Repeat to form a second half-hitch pulling the line around and over the first, then lock it under the first with a sharp tug.

Now form a second half-hitch (6-12" below first set - repeat step 2+3)
